Education

GSFC UNIVERSITY

09/2021 – 07/2025 | Vadodara, India

Bachelor's Degree, Computer Science and Engineer

Relevant Coursework: Artificial Intelligence, Machine Learning, NLP, Computer Vision, Deep Learning, Data Science, Software Engineering

Skills

- Languages: Python, C/C++, Java, SQL
- Deep Learning: FNNs, CNNs, RNNs, KNNs, LSTM, YOLO, Transformers, ResNet,
- Framework & Libraries: PyTorch, OpenCV, TensorFlow, Scikit-Learn, NLTK,
- Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, Watson Studio
- Data Science: Data Visualization, Statistical Modeling, Data Wrangling & Analysis

Projects

American Sign Language Recognition

12/2024 – 01/2025

Real-Time American Sign Language Recognition

- Developed an American Sign Language (ASL) Recognition system using deep learning to interpret hand gestures in real-time.
- Implemented a computer vision-based model to accurately classify ASL signs, enabling seamless communication for the hearing impaired.
- Integrated the system into a user-friendly interface for enhanced accessibility and interaction.

Animal Species Detection

02/2024 – 08/2024

Real-Time Identification and Classification using YOLOv8

- Preprocessed video data, converted annotations from Pascal VOC to YOLO format.
- Trained and fine-tuned YOLOv8 models to classify and localize multiple animal species with high precision.
- Built a Streamlit application to visualize detection results and enhance user interaction with live video feeds.

Stock Market Price Prediction And Analysis

01/2023 – 03/2023

Predictive Analytics and Interactive Visualization for Stock

- Developed a Stock Market Price Prediction and Analysis platform using Streamlit for interactive web visualization.
- Built a predictive model leveraging Yfinance data to forecast market trends and enhance decision-making

Professional Experience

IBM SkillBuild

06/2024 – 07/2024 | Vadodara, India

Intern

- Designed AI/ML models for predictive analytics and NLP solutions using IBM Watson and cloud platforms.
- Acquired hands-on experience in deep learning, model tuning, and data-driven decision-making.
- Finished certifications in AI, cloud computing, and data analytics.
- Created interactive dashboards and worked on real-world AI projects.

AeonX Digital Solutions Private Limited

12/2023 – 01/2024 | Bhuj, India

AIML Intern

- Created a Stock Market Forecast & Visualization platform with Streamlit and Yfinance data for trend forecasting.
- Helped develop a PaLM-based chatbot, augmenting conversational AI with cutting-edge NLP methods.
- Developed and fine-tuned predictive models for financial forecasting and auto-response. Developed data preprocessing, model testing, and real-time deployment of AI solutions.
- Acquired hands-on experience in Python, deep learning, and cloud-based AI technologies. Worked with a team to address practical AI problems and enhance system efficiency.

YBI Foundation

12/2024 – 12/2024 | Vadodara, India

AIML Intern

- Developed AI/ML models for predictive analytics and NLP applications using IBM Watson and cloud tools.
- Gained hands-on experience in deep learning, model optimization, and data-driven decision-making.
- Completed certifications in AI, cloud computing, and data analytics.
- Built interactive dashboards and collaborated on real-world AI projects like American Sign Language Recognition.

Courses

YBI Foundation

11/2024 – 12/2024 | Vadodara, India

NGO

- Implemented an American Sign Language (ASL) Recognition system based on deep learning.
- Acquired knowledge in machine learning, model assessment, and data preprocessing.
- Developed and implemented AI-based solutions for real-world use. Investigated deep learning, Python, and cloud-based AI technologies.
- Finished hands-on projects, bringing practical AI/ML skills.

IBM SkillBuild

06/2024 – 07/2024 | Vadodara, India

CSRBOX

- Acquired skills in AI, Generative AI, Transformers, and Large Language Models.
- Trained ML models with Python and experimented with AI-powered text, image, audio, and video creation.
- Designed and developed a chatbot with IBM Watson Assistant.
- Developed practical AI projects, improving problem-solving and implementation capabilities.
- Finished IBM-certified courses and delivered a final AI project.

Cloud Computing

07/2023 – 10/2023 | Vadodara, India

National Programme on Technology Enhanced Learning

(NPTEL)

- Acquired extensive knowledge of cloud architecture, virtualization, and service models (IaaS, PaaS, SaaS).
- Discussed cloud security, resource management, and deployment tactics.
- Done projects with AWS, Azure, and Google Cloud fundamentals for practical applications.
- Improved understanding of scalability, fault tolerance, and distributed computing.
- Completed the course successfully with NPTEL & IIT certification.
